

EPIC EQUINOX

cosmic energy report Spring 2026

At-a-glance

Big Picture: Our Evolutionary Shift

- **Faith Finale (The Nodes):** We are finishing an 18-month cycle of releasing worry, anxiety, and the need to control every detail (Virgo). We are ascending into **Pisces mastery**—trusting that even when things look like a "human disaster," there is a divine perfection at play.
- **Rebels Rising (Pluto):** Until 2043 we are in a long-term cycle of tearing down old systems to build a more humanitarian, tech-forward future.
- **It's Electrifying! (Uranus):** On April 25th, the energy shifts from the "stable earth" into a "fast-paced air" vibe. It's brilliant but can be a lot for the nervous system. If life throws you a curveball, it's just a "zap" to wake you up to your destiny.
- **Shaman Shift (Chiron):** We are finishing the healing of our "identity wounds" (standing in our power) since 2018 and a new mission to heal our "security wounds" (how we feel about money, food, and the earth) until 2034.

Monthly Play-By-Play

As the confusion of March lifts, April helps us initiate a new chapter. In May we work to find masculine and feminine balance, arriving to a place of sovereign rulership over our lives and our partnerships. That's needed because June is going to throw us trickster curveballs. But hold deep trust – the divine is on our side and even the squeezes are an opportunity to evolve into alignment with destiny. **You've got this!**

March: Curtain opens on a new chapter

The "confusion swirl" of the last few months starts to settle. The puzzle pieces are finally clicking into place.

- **The Vibe: Clarity is here** 💡 It's time to set boundaries, prioritize your wellbeing, and take the first steps toward your dreams.

April: Your first baby steps in this new chapter

This month is "Go Time." With six planets in fiery Aries, the energy is fast, focused, and initiatory.

- **Full Moon in Libra April 1** 🌱 **Sweet little sprout:** A moment to burst through the soil. We're releasing confusion and coming back home to our bodies and our pleasures.
- **New Moon in Aries April 14** 🔥 **Singing healing mantras around the fire:** Deep shamanic healing. Ask yourself: What is sticking for the long haul, and what is ready to burn away?

May: Feminine / masculine relationship transmutation portal

Relationships take center stage this month as we dance between deep emotional soul-diving and the desire to build something stable.

- **Full Moon in Scorpio May 1** ❤️ **Soul diving for balance in partnership:** A time to move deep emotions through the body and unearth hidden truths.
 - **New Moon in Taurus May 16** 🌹 **Embodied masculine + feminine balance:** A salve for relationship wounds. We're choosing love and deciding to build new, healthier dynamics.
- ! **Starts to get weird mid-May** with Uranus square the nodes – just know curveballs are meant to push you towards evolution. Find the opportunity; it's there.
- **Full Moon in Sagittarius May 31** 👑 **Wise king and queen in sovereign union:** Arriving at a place of true wisdom. You are the ruler of your own life, even in the midst of chaos.

June: Heyoka sacred clown trickster, anything can happen

Expect the unexpected! The energy is intuitive, emotional, and a little bit wild as we approach the Summer Solstice.

- **New Moon in Gemini June 14** 🤡 **Heyoka messenger of destiny:** The "Sacred Clown" is here to break down your rigid thinking. If things feel "backward," it's just the universe revealing a deeper truth. The energy is weird but there's spiritual depth here, it all has karmic meaning.
- **The Shift ☀️ By the Solstice (June 21),** we get one final push to release control. The "trickster" energy is ultimately on our side, guiding us toward our highest destiny.

She had an incredible gift at looking at the macro and micro simultaneously - seeing overarching trends in my chart as a whole and then relating those to specific transits and astrological events coming up. I learned about my chart in general and how the current astrology was playing a role in themes and patterns that were arising in my life. If you're curious, Amber is a true expert!" - Chelsea, USA

Deep dive

Evolutionary energies

The nodes =

Where eclipses happen, marks chapters opening and closing major themes of growth

- Starts at South Node (SN) 8° Virgo • North Node (NN) 8° Pisces = theme is releasing the shadow of virgo and ascending into the highest octave of Pisces
 - Virgo SN themes = trying to control everything especially details and practicalities, worry, obsession, anxiety, fear, frustration, mental swirl
 - Pisces NN themes = trust in the transcendental, knowing things are divine perfect even if they seem like human disaster, faith in something greater, soul diving into the void, communion with unseen realms and guides, intuition over thinking
- Ends at SN 1° Virgo • NN 1° Pisces = this is the LAST bit of this nodal journey (lasts 18 months) so we should be understanding this energy after working with it since Jan 2025. Choose mastery: let go of what you cannot control, choose trust! You've got this.
- Nodes move into Aquarius and Leo July 26th

Pluto =

The lord of the underworld, responsible for death → rebirth cycles

- Starts 4° Aquarius, makes it to 5° for summer = this is rebel transformation energy: tearing down the system and fighting for the people. Themes we will be working with until 2043: innovation, technology, community, humanitarian.
- Is inconjunct the SN all spring (don't understand each other) - most intense April 30 to May 29 = irritation as a catalyst, asking you to release Virgo shadow of control!

Uranus =

Planet of surprise awakening, unexpected jolts of knowledge, is electric and unstable

- Moving from Taurus to Gemini once again, we're going from earth to air, from 3D awakening to mental awakening. Uranus in Gemini is a LOT for the mind + nervous system.

- Starts 28° **Taurus** = Fixed earth energy, that's steady and stable to support building and growth – fertile, sensual, the fruits of the earth. Is 3D security like money, home, food, etc.
- April 25th moves into **Gemini** = Mutable air energy full of mental movement and a million bazillion always changing ideas. Watch information from technology especially.
- Makes it to 3° Gemini by June 21st
- Pluto trine Uranus in Gemini – starts June 17, remains through December = this is intense but an auspicious transformation portal. We are just beginning this journey with both of these evolutionary planets – AH HA realizations auspiciously support death + rebirth cycles.
- **Square the nodes** – Gets going in May, intensifies late May early June, exact 2° Gemini June 4-16, starts to soften July, especially when nodes change signs. = Stress aspects to Gemini are super unstable, like getting your AH HA moment by sticking your finger in a light socket. If you get thrown curveballs, remember they are awakening you towards destiny. **Is like a last zap for the end of our Virgo/Pisces nodal journey to make sure we GOT IT before moving on.**

Neptune =

The transcendental realm, in light is divine love, in darkness is nebulous confusion

- Starts at 1° **Aries** = Cardinal fire energy, action-oriented, initiates, launches, independent
- Just began an entirely new journey in Aries with Saturn = we are dreaming big and Saturn is helping us figure out both restrictions and how to build the dream despite them – Neptune will be in Aries until 2039, still discovering what this looks like for humanity!
- Pluto sextile Saturn March 19 and Sun March 24, stays sextile Neptune this entire time = individual, personal, spiritual processes auspicious for our transformation cycles

Chiron =

The wounded healer, working through our core wounds, discovering Shamanic medicine

- Starts at 25° Aries = we are wrapping up a chapter we started back in 2018 working through Aries wounds such as: "wound of identity" and reclaiming the right to exist, take up space, sovereignty, boundaries, anger, the masculine, etc... in the last karmic degrees these lessons will hit home. Think deep embodied somatic processes over the mental realms.
- Moves into Taurus just before Summer Solstice, June 19th – starts to square Jupiter = amplifies the painful aspects of this energy...
- Ends 0° **Taurus** = Fixed earth energy, that's steady and stable to support building and growth – fertile, sensual, the fruits of the earth.
 - Amber's take: we have been waking up to the dysfunction (Uranus) with our systems with things such as banking, food, etc... and now Chiron is going to come along and help us heal these wounds. Instead of just knowing about these problems, we'll have to viscerally work through them in an experiential way. Could be some very painful processes when it comes to our resources: 3D security like money, home, food, etc. The final result will be healing; he's here in Taurus until 2034.

Play-by-play

March 2026: curtain opens on a new chapter

Spring Solstice March 20

*The confusion swirl has unearthed valuable puzzle pieces and we start putting them together, understanding our destiny and how to take aligned action towards it = **launching a new chapter***

- **Mercury retro ends** – EXACTLY conjunct NN 8° Pisces = is extremely auspicious for having clarity when it comes to what aligned growth looks like for each of us. Is supporting that “let go of control and trust in the divine plan!” Pisces NN energy we talked about. You’ve had a lot stirring up, and now the pieces will start to click into place and you’ll suddenly know the right moves forward. Mercury post-shadow, completion of this process, wraps up April 9th back to 22° Pisces.
- **Saturn 4° Aries** = just started a new journey of solidity when it comes to you being an individual. Saturn is grounded and practical, while Aires is fiery and action-oriented. Supports setting boundaries and prioritizing individual wellbeing; but watch out for anger.
- **Venus starts 18° Aries too** = she knows what she needs, especially in love and is going to insist on being seen and respected. Passionate placement for relationship dynamics.
 - Conjunct Chiron the 25th, amplified by a square to Jupiter = is super tender for the feminine but offers healing. Do not be afraid to state what you need and set boundaries. Since Chiron is in Taurus, this may be about other Venesian themes too that are resources-related like money, beauty or values.
 - She goes into Taurus and gets grounded and sensual on March 30th. Amazing time to embody abundance, spend time in nature, enjoy earthly pleasures.
- **Mars starts 13° Pisces** = is a watery, confusing spot for our planet of action and desire. You’re still gathering all the pieces before moving forward. What if you let your emotion and intuition guide your next steps? Goes into Aries, ready for action April 9th right with Neptune = fueled by the dreams you are exploring right now.

planets, signs, houses, aspects

Planet key:

Pluto (your PURPOSE for coming to earth) = planet of evolutionary lessons! Pluto indicates the growth your soul came to planet earth to work on. Pluto lessons will repeat over and over forcing you to uplevel – like the peacock that loses its feathers every year but regrows them bigger and more majestic each time. It's the planet of metaphorical death and rebirth; life's hard knocks lessons that completely transform you. It's also money, sex and POWER (all things underworld). Doing our Pluto lessons is our life purpose.

NODES: The nodes are not planets, they're gateways from the past to the future and they're where eclipses happen! These are the twists and turns, the storyline that defines our soul's human journey, they mark chapters in our lives with big events.

South Node (your RELEASE PROJECT) = South Node is our past lives, where we came from. It's the karma we came to clear and rise above. Might indicate ancestral patterns, wounds and trauma in our bloodline that we have to work through and help heal. Usually in our youth, we spend time in the South Node because it's known + comfortable, then Pluto lessons swoop in and force transformation that pushes us to orient towards our North Node ↓

North Node (your GROWTH MISSION) = This is our mission in life! We came to grow into the North Node, it's our point of ascension and represents the highest expression of your soul. It's the soul whispers from the universe, it's THE CALL. All life's hard lessons will push us towards this evolution and growth. Finding your North Node and orienting your life towards it is living as your highest self. However, the North Node is completely unknown to our soul, so it's also very challenging for us. We have to evolve, take risks, take leaps, be BRAVE to fulfill our NN mission!

Midheaven (Your CAREER) = The top point of your chart, where wisdom meets career. Indicates your sacred work.

The big three: Moon + Sun + Rising

- You are born your moon, most innate emotional qualities, you need to be this sign, cannot avoid
- You are becoming your sun, it's where you'll shine your brightest but have to learn it
- Your rising is the pathway to become your sun, you use the rising sign qualities to actualize the power potential of the sun (how we rise up to the sun)

Moon = Our private, inner, emotional world, the subconscious. How we process events and information on an emotional level. Receptivity, sensitivity, intuition.

Sun = Our brightest, most luminous manifestation, the radiance of the self. Our individuality, ego, self, personality potential. If we were totally thriving in life 100% ourselves, THIS is how it would look. Often we have to grow into our sun sign! Our vital force driving our mission in life.

Ascendant = Where you meet the outside world. Heavily concerned with your outer appearance, like how you physically look + show up energetically. Often we are more in our ascendant sign in our youth and have to evolve into our sun sign as we grow. Always in the 1st house of self and the entire chart is mapped according to your ascendant.

Mercury = The planet of communication, rules the mind intellect and information. How we categorize and deliver info - basically how your mind works 🗣️. Mercury is the messenger - what we are meant to bring as a message to humanity and how we will tell that truth.

Mars = The planet of action, passion and desire! 🔥 Mars is what lights us up, motivates us and sets us on fire. Our drive: how we go after things and what we will fight for. Primal sexual desire and urges. Penetrating, moving forward inertia.

Venus = The planet of love, beauty, art, money = abundance in all its forms 🌸💰. All things delicious, enjoyable and pleasurable! What/who we value, attract and love. Our love language.

Uranus = The rebel hero planet, it's genius, it's wild ideas, it's the total unexpected, it's a weird alien, an antenna, electricity that shocks you! Is unstable anything can happen energy. Rebellious and revolutionary. This is where you are unconventional and a bit of a weirdo 🤪👽

Saturn = A practical planet that's all about the material world: hard work, money, health. Saturn marks the structure of life: it's cycles, it's aging, bones, teeth, wrinkles, putting in the time and work butt in seat showing up. Saturn lessons can be tough; it's 3D physical earthly restrictions like having to go to work to pay your bills. Might show up like tests, difficulty, delays and blocks until we learn our Saturn lessons. And these are important because Saturn also rules our legacy!

Jupiter = A benefic planet of luck and magic. Jupiter is the amplifier! Just beware... he will amplify and expand anything without good/bad judgment. Area of the chart where there's abundance + indulgence. Big energy that can deliver luck or overwhelm.

Neptune = The planet of spirituality, it helps dissolve the boundaries between this world and the great beyond. Neptune light side can be very beautiful as a higher octave of Venus it represents unconditional love helping us transcend the mundane and connect to the ALL the universe, the divine. Neptune's shadow side is a desire to escape reality and disassociate (think substances / addictions). It can create confusion + transcendental crisis.

Chiron = He is the wounded healer and this part of our chart reveals our core wounds, the most painful, tender, raw energy in our life. Might be a blind spot because it's painful to see and acknowledge. Ouch! His symbol is a key because we can unlock this! When we heal, Chiron becomes super shamanic and represents our healer gifts = how we can make art + medicine out of our pain.

Lilith = She asks us to go deep into subconscious exploration of the darkest things we feel and experience. A call to recognize our disowned shadow parts and mine them for the insights so we can integrate it all, become whole and claim our most powerful expression. Like Pluto, when Lilith is owned she is incredibly sexy and powerful.
